

Lenzing™ FR
THE HEAT PROTECTION FIBER

The heat protection fiber

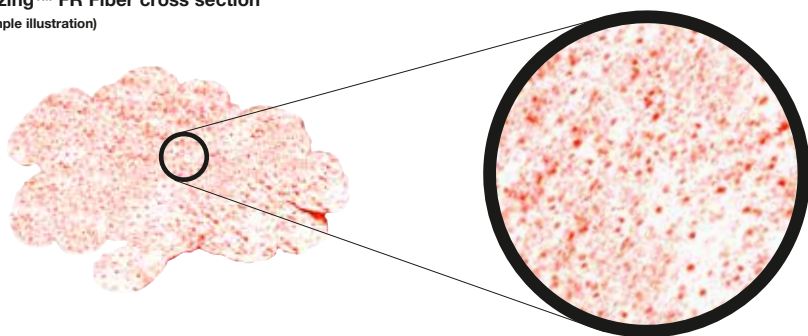

Lenzing™ FR is THE heat protection fiber

Lenzing™ FR offers incorporated protection from burns, heat stress, and heat stroke caused by flash fires, electric arcs, and other thermal hazards. The protective substance cannot be removed by washing or abrasion. Flame-resistant once, flame-resistant forever.

Incorporated protection

The permanently incorporated protection is made possible by Lenzing's innovative manufacturing technology. During the production process, a flame-resistant substance is incorporated into the Lenzing™ FR fiber. The protective substance cannot be removed by washing or abrasion. Flame-resistant once, flame-resistant forever.
